Professional Summary

Aspiring software developer with a strong interest in web and mobile application development. Skilled in Python, JavaScript, HTML, CSS, debugging, and problem solving. Interested in developing practical, user-friendly software solutions and continuously improving technical knowledge through hands-on projects and learning. A motivated learner who values professionalism, consistency, teamwork, and continuous improvement.

Technical Skills

Programming	Python, JavaScript, HTML, CSS
Web Development	HTML, CSS, JavaScript, Web Development
Mobile Development	Android Application Development
Tools & Skills	Debugging, Software Bug Finding, Problem Solving, ChatGPT
Areas of Interest	Ethical Hacking, Web Development, Mobile Applications

Projects

Real-Time Indian Airfare Price Intelligence *Python, React, FastAPI, PostgreSQL*

- Developed an airfare intelligence engine prototype for the Smart India Hackathon (SIH 2026) to augment the Consumer Price Index (CPI).
- Built an automated data pipeline to ingest, normalize, and analyze flight fares, utilizing a Laspeyres-weighted formulation to calculate a Prototype Airfare Price Index.
- Implemented Z-score anomaly detection for pricing spikes and integrated an automated WhatsApp Multi-Device Gateway for real-time intelligence dispatch.

KubeMindAI *JavaScript, Python (Flask), HTML/CSS*

- Built a complete Rubik's Cube Solver and interactive 3D simulator web application.
- Designed a modern user interface featuring a Futuristic Dark Glassmorphism Theme.

StudentBuddy *JavaScript*

- Developed a comprehensive study workspace and focus companion designed specifically for high school, college students, and self-learners.
- Engineered productivity tools aimed at boosting academic performance and preventing student burnout.

MessWise-OS *Kotlin / Android Development*

- Developed a native Android application using Kotlin to streamline management operations and deliver a seamless user experience.

Inventory Management System *Python / Software Development*

- Developed an inventory management system for organizing and managing product information.
- Focused on creating a practical software solution with an easy-to-use workflow.
- GitHub: `github.com/CodeWithUdit17/inventory-management-system`

Education

Lovely Professional University (LPU) *August 2026 – August 2030*
Bachelor of Technology (B.Tech.) – Computer Science

St Peter Sr. Sec. School *April 2016 – May 2026*
10+2 – Mathematics and Computer Science

Certifications

- Build a Website Using ChatGPT
- Introduction to Digital Marketing
- Building Games Using Java
- Tutedude Python
- Excel for Beginners
- Ethical Hacking – Mobile/Networks
- Front End Development – CSS
- Front End Development – HTML
- Python Fundamentals for Beginners

Core Strengths

Problem Solving | **Debugging** | **Continuous Learning** | **Teamwork**

Open to Software Development, Web Development and Mobile Application Opportunities
